

## GV Logo

### Assignment Content

- **You must install SDL2 on your system prior to starting!**

You will need to create the lexer rules in the gvlogo.l file, then complete the CFG in the gvlogo.y file. Then, you can write the code to implement the features.

Recall, you build as follows:

- `bison -d gvlogo.y`
- `flex gvlogo.l`
- `clang *.c -o gvlogo -lSDL2 -ll -lm`
-
